

## Environmental Policy

August 2010

We are aware of the fact that our processes and our daily behaviour take influence on the natural environment.

Following our environmental stewardship we apply our policy as a framework for setting and reviewing our environmental targets and objectives.

We conduct our operations in order to comply with all existing environmental legislation and to minimize the risk of all forms of pollution. To meet this commitment we provide appropriate resources, information, instructions, trainings and supervision to our employees and contractors.

Furthermore we declare to continually improve the effectiveness of our environmental management system and to maintain an open information policy towards all parties affected, interested and involved in our activities.

Our objective is to minimize the environmental impact of our activities and to encourage our suppliers and customers to adopt our environmental practices.

The policy and the way it is operated will be reviewed at least annually and more often if the business changes in nature or size. Any revision necessary to improve our environmental performance will be made and then reported to all relevant stakeholders.

The environmental manager is responsible for the management system and reports to the company's management frequently.

All employees of OMICRON are obliged to keep the instructions given and to cooperate in minimizing our environmental impact.

Manfred Strauss

Managing Director
